SUMMARY

Final-year Informatics student specializing in backend engineering, with a focus on building scalable systems using layered architectures. Passionate about modern infrastructure, actively expanding skills into DevOps and cloud automation. Complemented by hands-on Android development experience and foundational knowledge in frontend integration, bringing a versatile, systems-first mindset to software development.

EDUCATION

Universitas Pembangunan Nasional “Veteran” Jawa Timur 2022 - present

- Major: Informatic
- GPA: 3.8

EXPERIENCES

Bangkit Academy 2024 H2 – Google, Tokopedia, Gojek & Traveloka Sep 2024 – Jan 2025
Android Development Cohort - Remote

- Translated 8 high-fidelity Figma screen designs into native Android layouts using Kotlin, maintaining accurate design fidelity and ensuring responsive UI performance across multiple device screen sizes.
- Integrated 5 distinct RESTful API endpoints using Retrofit, efficiently processing data from 4 custom cloud-hosted backend endpoints and 1 external third-party API.
- Optimized mobile performance by implementing asynchronous networking to communicate with a cloud-deployed Machine Learning model, maintaining an optimal API request latency of 360ms – 450ms.
- Collaborated with a cross-functional team of 7 members with different roles to successfully complete a final project.

PT. Anugerah Prima Manunggal Feb 2025 – May 2025
Backend Developer Intern – Remote

- Collaborate on building a robust server-side application using JavaScript and Express.js, architecting 5 core operational modules (User/Admin, Item Management, History Tracking, Pre-Order Processing, and Delivery Notes) to streamline warehouse workflows.
- Designed and managed a schema-flexible MongoDB database to efficiently catalog a high volume of culinary items, managing varied product codes, condiment ranges, and cooking seasoning variants.
- Containerized the backend infrastructure using Docker and successfully deployed app via Google Cloud Run, ensuring high service availability.
- Acted as the version control lead for a 3-member engineering team (2 Backend, 1 Frontend); managed organizational GitHub repositories by establishing branching strategies, reviewing Pull Requests (PRs), and maintaining deployment readiness.

PROJECT

U-Connect Nov 2025 – July 2026

- Architected and developed a full-stack alumni and student community platform using Go and Vue.js to resolve critical university networking, mentorship, and internal job-matching gaps.

- Structured the application using a rigid three-tier architecture (Frontend, Controller, Service, Repository, Database) to ensure clean separation of concerns, scalable system maintenance, and system growth.
- Implemented a personalized Mentor Recommendation Engine utilizing Content-Based Filtering algorithms to match students with alumni based on shared technical domains and professional interests, achieving a Mean Average Precision (MAP) score of 82.5% during evaluation.
- Modeled and designed complex relational database schemas and system workflows using Use Case, Activity, and Sequence diagrams to optimize query performance and data integrity.
- Applied the Community of Inquiry (CoI) theoretical framework to system design and conducted usability evaluations with 15 respondents, securing an above-average System Usability Scale (SUS) score of 76.66.

PUBLICATION

Klasifikasi Kanker Paru-Paru Menggunakan Histogram Equalization dan Arsitektur MobileNetV2 - 2026, Prosiding Seminar Nasional Penelitian dan Pengabdian Kepada Masyarakat LPPM Universitas 'Aisyiyah Yogyakarta, Vol. 4 (February 2026)

Mentor Recommendation System Using Content-Based Filtering with TF-IDF and Cosine Similarity – 2026, Bit-Tech (Binary Digital Technology) Journal (Forthcoming August 2026)

SKILLS

Programming Language: JavaScript, Go (Golang), HTML, CSS, Kotlin

Developer Tools: Visual Studio Code, Postman, Android Studio, Figma, Docker

Frameworks & Libraries: Express Js, Vue Js, GORM, Fiber, Gin

Databases & Cloud: MySQL, MongoDB, PostgreSQL, AWS

Soft Skill: Communication, Problem Solving, Time Management, Adapting to Technology.
